1 Demo Video

The demo video for the current working software version can be found in the following Youtube [link](#).

2 Implemented and Working Use-Cases

The current working software version has the following main use-cases whose main flows are implemented and working:

- The “Read a book” use-case (the use-case 2.9 in the use-case specification document)
- The “Rate a book” use-case (the use-case 2.21 in the use-case specification document)
- The “Search books” use-case (the use-case 2.7 in the use-case specification document)
- The “See book recommendations” use-case (the use-case 2.34 in the use-case specification document)
- The “See detailed information of a book” use-case (the use-case 2.8 in the use-case specification document)
- The “Comment” use-case (the use-case 2.22 in the use-case specification document)
- The “In-book navigate” use-case (the use-case 2.10 in the use-case specification document)

Beside of these main use-cases, there are also following other use-cases whose main flow are implemented and working:

- The “Register a new account” use-case (the use-case 2.1 in the use-case specification document)
- The “Log in to a registered account” use-case (the use-case 2.2 in the use-case specification document)
- The “Reset Password” use-case (the use-case 2.3 in the use-case specification document)
- The “Log out” use-case (the use-case 2.4 in the use-case specification document)
- The “Manage profile information” use-case (the use-case 2.5 in the use-case specification document)
- The “Change password” use-case (the use-case 2.6 in the use-case specification)

The remaining use-cases are still under development.
